

## SIGNATURE CHARTER FOR SCIENTIFIC PUBLICATIONS OF THE RESEARCH STRUCTURES OF THE UNIVERSITY OF MONTPELLIER AND ITS PARTNERS WITHIN THE FRAMEWORK OF THE PERENNIAL I-SITE

This charter has been drawn up with the partners of the Montpellier Université d'Excellence I-Site Excellence Programme project and in application of the AVIESAN charter. At its meeting of 5 December 2016, amended on 3 March 2021, the Research Committee of the Academic Council of the University of Montpellier in plenary session approved unanimously the signature charter for scientific publications by authors who are members of the research structures of the University of Montpellier.

A standardised signature is essential for identifying the publications of universities and research bodies in bibliometric surveys, evaluations and international rankings.

### APPLICABLE PRINCIPLES:

- Single-line address,
- The University of Montpellier must be indicated in the first position as "Univ Montpellier", "Université de Montpellier" or "University of Montpellier",
- Designation of the unit only by its acronym or short title in the absence of an acronym (no UMR or UR number, etc.),
- Compact address: city and country (no street, postcode or cedex).
- Special case: the employer is not the supervisor of the unit or is a secondary supervisor:
  - This will be mentioned in the same way as a supervisory body in the affiliation of the author concerned,
  - Health establishments must be indicated as "CHU Montpellier", "CHU Nîmes" or "ICM".

The publications will therefore be signed as follows:

**[Unit acronym or short title], Univ Montpellier, [main supervisory authority(ies)], [employer if different from main supervisory authority(ies)], [city of research unit], France**

In the case of work funded by a research aid programme, the publications must mention the name of the sponsor and the programme concerned:

"This work has received funding from [name of the funder] as part of the... programme".

For work funded by the Montpellier Université d'Excellence I-Site Montpellier University of Excellence Programme

This work has received funding from the French government under the France 2030 Programme, Initiative Sciences Innovation Territoires - Université de Montpellier".

## ANNEX

### Signature model for articles from research units for which the University of Montpellier is the supervisor under the 2021-2026 institutional contract

Depending on the publishing rules of the journals and the charters of the other supervisory bodies (in particular for CIRAD, please refer to the letter from the CEO), the proposed model may be adapted\* but the elements listed here remain required.
